Java

```java
class Solution {
    public long pickGifts(int[] gifts, int k) {

    }
}
```

JavaScript

```javascript
/**
 * @param {number[]} gifts
 * @param {number} k
 * @return {number}
 */
var pickGifts = function(gifts, k) {

};
```

TypeScript

```typescript
function pickGifts(gifts: number[], k: number): number {

};
```

C++

```cpp
class Solution {
```

```cpp
public:
    long long pickGifts(vector<int>& gifts, int k) {

    }
};
```

C#

```csharp
public class Solution {
    public long PickGifts(int[] gifts, int k) {

    }
}
```

Kotlin

```kotlin
class Solution {
    fun pickGifts(gifts: IntArray, k: Int): Long {

    }
}
```

Go

```go
func pickGifts(gifts []int, k int) int64 {

}
```
